Roller Garage Doors For Your Home

2022

Deluxe 77

Our Deluxe 77 roller garage doors are perfect for larger garages, but can be just as easily installed on smaller openings to provide functionality and efficiency while keeping the costs affordable.

This range of doors have a maximum opening width of 16ft, and are well suited for single, large or double-sized garages. All our remote controlled Deluxe 77 roller doors come with two remotes as standard with two occupants in mind, meaning that neither user has to go without the added convenience and ease of use that remote access offers.

We create strong, durable and efficient doors with only 300mm (12 inch) square roll housing and 95mm (4 inch) guide runners the Deluxe 77 is designed to be as compact as possible to take up minimal storage space within your garage.

Our Deluxe 77 roller garage doors are available in a range of colours and with a number of optional extra features and safety functions to ensure ease of use and an attractive aesthetic.

Max. opening height up to:	2440mm (8ft)

Compact 55

Our Compact 55 roller garage doors are ideally suited to single sized openings garages. This garage door is slimline, with the box and guide runner taking up very little space within the garage.

The maximum total width of an Compact 55 door is up to 8ft, including the frame, so really is built with scale in mind. This space saving model can be measured and fitted by our own team of experts.

We believe that the size of your garage shouldn't influence the quality of your garage door, so our Compact 55 roller doors are constructed to consistently high standards and offer smooth, easy operation and a strong, robust door that is guaranteed to last for years to come.

Our range of Compact 55 roller doors come with two remote control handsets as standard, with additional handsets available if needed. We use robust and durable aluminium to manufacture our doors, which are available in a range of colours.

Max. opening width up to:	2310mm (7ft 7")
Max. opening height up to:	2285mm (7ft 5")

Colour Options

We understand that alongside excellent quality, style and aesthetic appeal is a very important feature for any roller garage door. That's why with Tradedor there's no need to worry about finding that perfect shade for your garage door; with fifteen standard colours, 3 laminate wood effects and the custom RAL colour options to choose from, you can go as bold or as understated as you want.

With our standard colours we can quote references that are the nearest standard RAL, they will not be an exact match and are intended as a guide only but there is nothing like the real thing so we also offer free colour samples that can be delivered to you.

Within our range we also offer a colour match of the guides, base rail, header plates and roll housing which we try to make as exact as possible to the slat colour, due to the manufacturing process of the slat profile resulting in a textured finish while all other coloured items are supplied in a smooth finish we cannot guarantee an exact match.

* Laminate and Irish Oak options are only available in TD77 range

Free Colour Samples

These are photographic representations of our colours and although we have matched them as close as possible there is nothing like the real thing. We offer free colour samples that can be delivered to you, if you are interested in a sample then please let us know what colour and the address to send it to then we will get this arranged for you.

*Please be aware that all colours can vary slightly due to batch variations.

Construction Parts of a Roller Garage Door: Slats

We want our products to reflect our quality craftsmanship, which is why all of our slats are double skinned with a thick foam filled insert and constructed out of strong, robust aluminium for longevity and durability.

Compact 55 Slats

The slats for our Compact 55 range of doors are 55mm high and 8.2mm thick with a foam filled insert. The slats are made from powder coated aluminium available in a choice of 14 colours.

Deluxe 77 Slats

Our range of Deluxe 77 slats are 77mm high and 18mm thick with a foam filled insert. Our slats are constructed out of high quality, powder coated aluminium and are available in any of the 18 colours in our range, with 15 painted colours and 3 laminate options to give you a wide range of aesthetic options.

Our slats are accurately cut and assembled into the curtain by our own on-site team using state of the art machinery to match each individual doors specifications, ensuring a perfect fit for every door frame, a strong seal and a long-lasting door.

Our double skinned aluminium slats offer many benefits over single metal sheet doors, including:

- Increased insulation
- Strong physical barrier
- Reduced likelihood of break-ins
- Increased protection from ultraviolet and infrared rays
- Reduced sound pollution
- Protection against volatile weather
- Space saving within the garage
- Quieter functioning

Guide Runners

We stock a large supply of robust and durable aluminium powder coated guide runners, constructed to the highest quality using the finest materials. Our guide runners are specially designed to allow the curtain to run smoothly and with the double brush in the guide runner to protect the roller door system from debris that can get caught, as well as help reduce drafts. Our guide runners will ensure a long lasting, quality product to ensure complete satisfaction for you.

Base Rails

Our base rails are made from extruded aluminium to increase the strength of the curtain of the door, ensuring the longevity of our roller garage doors. All of our base rails come as standard with a rubber strip in the bottom edge to help with insulation and noise reduction, while also working as a deterrent to pests and to provide protection against water ingress; our rubber seals help to keep your garage protected all year round.

Roll Housing

All of our roller doors are fully enclosed in a roll housing that is designed so it can be installed in a variety of ways:

- Inside the garage behind the lintel
- A limited fixing so as much as possible is behind the lintel
- Fully below and in the opening of your garage
- With the addition of silicone to help seal the joints they can even be installed outside your garage

(Please Note* The roll housing will be visible and the concave face of the door slats faces outwards, with an external fitted shutter)

We supply a fully enclosed roll housing because it is part of the machinery directive to stop entrapment, and ensures the longer lasting life of the internal mechanism. The enclosed roll housing is constructed out of strong and durable aluminium and can help protect your garage door from any accidental damage that can affect the functionality of your door. Our roll housing and guide runners come as standard in white, but we do offer a colour match facility where possible as an optional extra.

Benefits of a Roll Housing

- Provides a fascia for the door
- Provides the curtain with weather protection all round
- Protects the components of the door from dust or debris that can jam mechanisms
- Creates a very neat appearance
- Reduces operating noise
- Increases the insulation and draught-proofing qualities of the door
- Reduces the risk of fingers, ties, hair etc. being caught up in the mechanisms

Control Systems

Through the construction of our doors and the integration of the latest cutting-edge technology, our roller doors strike the perfect balance between security and convenience. With this in mind we offer simple controls which operate on a hold to run operation through to our Somfy Branded system with alarm.

Rocker Switch

- Hold to Run operation
- Door can only be operated by someone inside the garage
- Large rocker button for ease of use

Remote Control Hardwired Safety Edge

- Automatic Operation open & close
- Safety edge device with curly cable
- Optical cell through the base rail rubber which travels with the door curtain

Remote Control Wireless Safety Edge with Alarm

- Automatic Operation open & close
- Wireless safety edge device via battery operation
- Safety edge device which travels on the last slat of the door curtain
- Audible alarm system should someone try to pry your door open from the outside

Key Switch

- Hold to Run operation
- Can be installed so the door can be operated by someone either inside or outside the garage
- Security keys needed to operate the switch

Remote Control Wireless Safety Edge

- Automatic Operation open & close
- Wireless safety edge device via battery operation
- Safety edge device which travels on the last slat of the door curtain

Somfy Remote Control Wireless Safety Edge

- Automatic Operation open & close
- Wireless safety edge device via battery operation
- Safety edge device which travels on the last slat of the door curtain
- Audible alarm system should someone try to pry your door open from the outside
